PROFESSIONAL SUMMARY

Tech Lead and Full-Stack Engineer with a decade of experience spanning technical training, freelance software development, and enterprise delivery, including four years leading architecture for .NET/C# platforms with industrial IoT integration. Brings hands-on AI/LLM architecture experience and a training background suited to technical leadership and mentorship.

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, TypeScript, Python, PHP

Frameworks: .NET, ASP.NET Core, React.js, Node.js, FastAPI, Spring Boot, Angular, Symfony

Web & 3D: Three.js (WebGL), REST APIs, HTML5/CSS3, Twig, Razor, AJAX

Data & Databases: PostgreSQL, Neo4j, Redis, Apache Kafka, MySQL, SQL Server

AI & DevOps: LLMs, RAG, Docker, Git, Linux, CI/CD (TeamCity, TortoiseHg)

Methodologies: Agile / Scrum

WORK EXPERIENCE

Technical Lead & Software Engineer

L-mobile Systeme GmbH & Co. KG, Nabeul | October 2022 – Present

- Lead architecture and full-stack development for Unicore, a plugin-based warehouse management platform (ASP.NET Core, .NET 8, NHibernate, TypeScript, SignalR, OData).
- Migrate legacy .NET Framework modules into the current architecture incrementally, with zero production downtime.
- Design cross-module integration systems used across the platform.
- Build AI-assisted features, including automated visual quality control using image comparison to detect defects.
- Integrate third-party and industrial IoT hardware (RFID, SpeedyPick, Wermalight, industrial scales).
- Define coding standards and CI/CD pipelines; mentor interns and junior developers.

IT Trainer — Web Development & OOP

Centre de Formation Privé Electoworks, Gafsa | March 2017 – March 2022

- Delivered hands-on, project-based training programs covering Java, C#, HTML5/CSS3, PHP7, Symfony, React.js, Angular, and Python.
- Designed practical curricula focused on industry-standard patterns to elevate student coding proficiency and employment readiness.

Academic Project Supervisor — Freelance

Self-employed | 2020 – 2022

- Supervised "Voisinage," a student final-year project building a collaborative-consumption web platform connecting neighbors to share, exchange, and lend everyday items (Symfony, PHP, AJAX, HTML5/CSS3, Git, Swagger).
- Supervised a final-year project building a document management (GED) system for financial treasury operations (Symfony, AJAX, HTML5/CSS3).

Freelance Software Developer

Self-employed | June 2013 – 2019

- Built a Training Center Management Platform: multi-group scheduling, trainer-class organization, automated invoicing, and real-time attendance tracking, with Chart.js KPI dashboards (Symfony, PHP, jQuery, Chart.js, MySQL).
- Built an Inventory & Stock Management Desktop System: stock control, supplier tracking, purchase orders, and real-time inventory adjustments with transaction integrity safeguards (.NET, C#, SQL Server).
- Built a desktop application to organize materials into boxes on a packaging line, using a barcode-based calculation system (C#, .NET).

IT & Operations Lead

- Managed the store's IT systems, stock management, and staff operations for a large retail operation.

FREELANCE PROJECTS

DocuMind | AI-Driven B2B Document Intelligence Platform

- Architected an AI document analysis system using LLMs and RAG to automate semantic extraction and risk assessment from unstructured legal contracts and financial PDFs.
- Engineered a multi-tenant PostgreSQL database with Row-Level Security (RLS) for data isolation and built an asynchronous Celery/Redis ingestion pipeline for complex file processing.

Tech Stack: Python, LLMs, RAG, PostgreSQL, Celery, Redis, Docker

Nexio | B2B SaaS Assembly Automation Platform

- Engineered an automated 3D CAD assembly planner using a symbolic-AI algorithm and Neo4j graph structures across a polyglot monorepo, accelerating setup workflows by ~92%.
- Built an asynchronous messaging backend on Apache Kafka and Redis for CAD ingestion, and implemented multi-tenant data isolation in PostgreSQL using Row-Level Security (RLS).
- Developed a responsive WebGL viewer in React and Three.js featuring step-by-step 3D navigation and a drag-and-drop workspace for manual assembly guidance.

Tech Stack: React, Three.js, TypeScript, Node.js, C# (.NET Core), Python (FastAPI), Apache Kafka, Neo4j, PostgreSQL, Redis, Docker

MENTORSHIP & ACADEMIC SUPERVISION

- Supervise and mentor final-year engineering students (PFE) during graduation projects, both within the company and through freelance consulting, guiding them on software architecture and clean code practices.

EDUCATION

National Engineering Degree in Computer Science — IT Business School, Nabeul

June 2025

Bachelor's Degree in Computer Science — Faculty of Science of Gafsa

June 2011

Baccalaureate in Computer Science — Lycée Cité des Jeunes, Gafsa

June 2008

CERTIFICATIONS

- Scrum Foundation Professional Certification (SFPC) — CertiProf, issued January 2024 (Credential ID: 93409804)
- Claude Code in Action — Anthropic, issued May 2026 (Credential ID: deyo2he9gyy)
- Claude 101 — Anthropic, issued May 2026 (Credential ID: u3ieqert8diq)
- AI Fluency: Framework & Foundations — Anthropic, issued May 2026

LANGUAGES

Arabic: Native | French: Advanced | English: Intermediate

CORE STRENGTHS

- Leadership & Team Collaboration
- Problem-Solving & Innovation
- Self-Learning & Adaptability
- Project Management & Communication
